Alabama Precancels, Catalog and Guidebook

Introduction

This book is intended to be a catalog of known Alabama precancels as well as a guidebook to assist the collector with the varieties listed in the Precancel Stamp Society (PSS) catalogs and other sources. It includes pictures of all the varieties. These can be used as correct scale templates for comparison with real stamps. There are 341 towns and 548 different precancel types recognized by the PSS in Alabama.

Values are given as found in the Town & Type Catalog 7th Edition (T&T) including the official update of November 2009. T&T pricing is for the most common precancel of the designated type. I believe it is unwise to suggest alternative pricing for the known denominations – such pricing being overly subjective. It is always a good idea to pay a little more for something you have never seen before. However, items unlisted in this catalog should not be assumed to be rare or valuable. In Alabama there are two A-rarity types (\$250-up) and two AA-rarity types (only one copy known). T&T pricing can be considered a reliable, real-world retail valuation.

I consider this book to be a part of an ongoing project to locate and tabulate all denominations of Alabama precancels. These listings include stamps from my own Alabama general collection, items reported by other collectors, as well as items found in the references listed below. I have not editorialized the listings to remove precancels that were collector inspired. In truth, 99% of the listings not found in the 1954 state catalog would fall into that category.

I actively solicit information on any items not listed, including those found in earlier catalogs. With the correspondent's permission, they will be included in future versions. I will pay a fair price for any Alabama items I need for my collection.

Improvements in the 4th and 5th Editions - Summary

Integration of listings from Bruce Brunell's Printed catalog
Adding denomination counts to all types
Reorganized and expanded Postal Stationery
Added populations where given in the 2010 Census
Added denomination listings from many other sources especially a large South American collection - over 35,000 items now listed
Numerous corrections of typos and errors
Additions and Deletions as found in the 2014 edition of
PSS Catalog of Classic Precancels Part 2A (A-M)

- note: there are no Alabama precancels listed in (pre-1908), all pre-1908 items listed my book should be considered unofficial favor cancels.
PSS Catalog of Classic Precancels Part 2A (A-M) Phil Cayford, Managing Editor 2014
- note: some items listed erroneously in 1940 Hoover, and carried forward to 1954 Alabama have been deleted from this reference. These deleted items are listed as comments in my book.

Items not seen by me are noted with *, ^, or ~, &.

- + indicates the denomination has been reported to me by another collector
- @ indicates seen on Ebay offerings
- * indicates listed in 1954 Alabama
- ^ indicates listed in 2011 Printed
- & indicates item is a new classic listed for the first time in (A-M)
- ~ indicates item is listed in one of the other catalogs mentioned above

Listings – Organization and Abbreviation

My organization and abbreviation of the listings is subjective. Currently there is no ‘best practice’ guideline for state catalog editors. What fits for one state may be inappropriate for another. Listings are generally chronological within city/type. An asterisk * after city name indicates a Discontinued Post Office (DPO) according to the T&T.

On printed precancels - inverts, positions, and multiples are indicated by lowercase letters: i=invert, nn=double normal, u=up etc. Coils are listed as H for horizontal perforations or V for vertical if ambiguous. In keeping with precancel tradition, stamp paper watermark differences are not distinguished.

1926 includes the Harding Full Face (1½FF), Stuart (3S) and Taft (4T) issues. Liberty includes Pershing (8P), Jackson (1J), Washington (5W), Flag (5F), and the Giori press Liberty as 8G, but does not differentiate the flat and rotary press 8 cent varieties. Prominent Americans (PA) include the blue USPS stamp (8USPS), the ZIP stamp (10Z), the Jefferson Memorial (10J), and the 6.3 coil. Eisenhower stamps are listed as 6E & 8E. Flags include the 6 cent Giori (6G) and Huck (6H) presses, and 8F, 10F. Great Americans (GA) and Transportation Coils have clarifying letters on denominations.

Se-tenant issues are listed with the number of stamps in parenthesis if complete:
1968: 6Flags(10) indicates 10 stamps, 1968: 6FlagsBennington indicates one stamp only.

A count of known denominations is provided in brackets.
For example [120,5] indicates 120 denominations known - 5 needed for my collection.

Dated Controls

Dated controls are listed with the dates seen in addition to the undated denominations.

Printed Dated lists:

BIRMINGHAM: SPE-1 and SPE-2 (Spiegel Catalog), TCP-2 (The Cuneo Press)

MOBILE: SB (unknown user)

Handstamp Dated lists:

BIRMINGHAM: BDC (1964 unknown), GBC (Graybar Electric), G.P.Co (1941 Garlock Packing Co), GTR (1938 Goodyear), L.C. (1939 Levenson Co), LO (1938-40 Liberty Overalls), RSC (1955 unknown), T.C. (1945 Todd Co), T.Co. (Todd Co), WDC (1938-39 Wernet Dental Co), WMA (1938-39 W.M.Acton [stamp dealer])

MOBILE: SB (1938, unknown), SR&Co (1947, Sears Roebuck & Co)

SELMA: CAD (1939, Central Alabama Drygoods Co)

Many Cities: G.C. (Gil Chenkin) and N.F.C. (Natural Foods Co, a Chenkin operation)

Authorizations Dates

Lyon List data are provided in small print preceding the PSS type. Abbreviations are:

- E for Electrotype – usually plate of 100 subjects
- H for Handstamp (pre-1932 type) – 25 subject rubber device
- WHE for Wide Hand Electro – 25 subject device prior to June 30, 1934, after that 10
- NHE for Narrow Hand Electro – 10 subject device
- V for Vinyl – 10 subject device

The Lyon List includes many authorization dates for precancels that have never been seen. These may not correspond to an actual shipment of precancels to the post office; however they do provide a clue to what Alabama precancels could be undiscovered. Examples are the scarce Prattville and Millbrook handstamp types that the Lyon List noted as unknown, but were discovered in recent years.

Authorized but undiscovered styles:

HANDSTAMPS (pre-1932 types): AUTAGAUVILLE, CALERA, CAMDEN, CITRONELLA, ELMORE, EVERGREEN, HIGDON, MAPLESVILLE, MILLBROOK, NEWVILLE, NOTASULGA, OPP, RED BAY, RED LEVEL, SALEM, SEALE, WHISTLER.

WHE's: ANDALUSIA, ATMORE, CULLMAN, CYPRESS, FLORALA, FORT PAYNE, HIGDON, JACKSON, LEIGHTON, MONROEVILLE, NOTASULGA, PITTSVIEW, RED LEVEL, SEALE, VALLEY HEAD.

NHE's: ACMAR.

VINYLS: these may be identical to the PSS listed varieties and therefore not separate listings: ABBEVILLE, ALMA, BELLAMY, BIRMINGHAM, BRANTLEY, CALERA, FORT PAYNE, GREENVILLE, NEWELL, SIPSEY(NEY), TUSCALOOSA.

Identification – Difficult Cases

CRICHTON 721 & L-1 HS:

These two types are exactly the same dimensions and fonts. 721 is steel, L-1 is rubber. 721 looks metallic, stiff, some breaks in the lines. L-1 looks rubbery, often spongy. Some stamps are much less obvious than others. For the type collector, select an unambiguous example. The general collector must resort to guessing on occasion because the types were in use on the same stamps.

ELBA 701 & 708:

701 → ← 708

708 has slightly wider spacing between town and state. 708 does not appear after the 1932 Bicentennial issue.

GARDENDALE 735 & 748:

735 → ← 748

735 always has a visible comma after city.

GUNTERSVILLE 734 & 748:

734 → ← 748

734 has wider, stubby lines and does not appear after the 1954 issues. For the type collector, select an unambiguous example.

MOBILE 818, 828, 839, & 841:

818 → 828 → 839 → 841 →

818 has ALA for state. 828 has a comma after city. 839 has larger letters than 841. 841 is a more recent type; small, no comma; seen only on Americana and later issues.

MONTGOMERY 257 & 723:

257 → ← 723

Similar, but 257 is the smaller type.

SARALAND 841(3, L,AAA) & 841(3, AA):

841 (3 L,AAA) →

(wide-L) (3 wide A's)

(all 'normal') (2 wide-A's)

←(3,AA)

If the city has a wide-L, or 3 wide-A's, it is the former.

If all of the A's are normal with no wide-L or city has 2 wide-A's then the latter.

Footnote-3 indicates font varieties exist in some or all positions within the device.

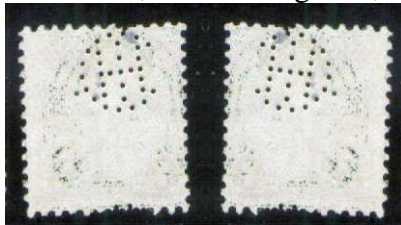

Footnote-4 indicates line spacings vary within the device by more than 1/2mm.

When viewing on a PC, you can zoom in on the pictures to assist with identification.

Perfins

Perfins lists 2 patterns. Ratings apply to non-precancels, precancels are much scarcer.

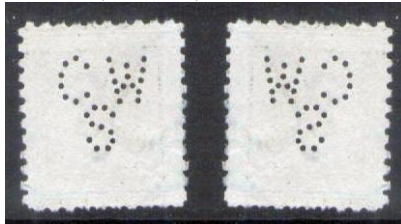

Perfin pattern I43.7-19, interlocking IHC, International Harvester Co. from Birmingham.

I43.7-19 →

Pattern rated "C+", about \$5.00

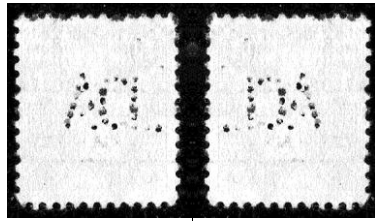

Perfin pattern C376, CW/S, Charles Williams Stores from Montgomery.

C376 →

Pattern rated "E" common

Unlisted in Perfins is perfin pattern A76, ACL, Atlantic Coast Line Railroad from East Tallassee.

A76 →

Pattern rated “E” common

Unlisted in Perfins is perfin pattern J144, JS/C, Johnson Smith & Company from Mobile.

J144 →

Pattern rated “E” common

Population of Alabama Towns

According to the 2010 Census the population of Alabama is 4,779,736 making it the 23rd most populous state. Of the 341 PSS-listed towns only 275 show up in the Census Bureau reports. The other 66 are unlisted for a wide variety of reasons. Many towns have more stature with the USPS than with Census. Some are ghost towns or annexed by bigger communities. The history of these 66 while interesting, is beyond the scope of this book. County and ZIPCODE are indicated where known. Some town names are duplicated within Alabama and occur in more than one county.

The largest city is Birmingham with 212,237. The smallest Census-listed town with precancels is Dayton with 52. Mooresville is the only Census-listed town with more denominations than people. Hoover at 81,619 is the largest city in Alabama with no precancels.

[1124,707]

SB printed dated control is valued at \$5.00. Imperf between variety only comes on the 7 cent and is valued over \$100.00. Check it closely; the stamps must have no sign of perforations. 47 of these denominations are considered the true Alabama Double Line Electros (DLE's). The others are recent printings made by a collector. See the DLE catalog for details.

POSTAL STATIONERY

A four part code is used to describe each face-different precancel envelope. Using Alexander City as an example 1b2E:

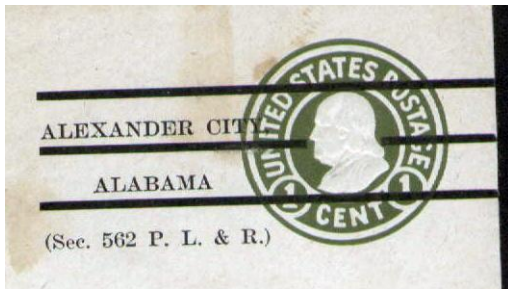

1 indicates large serif typeface
 b indicates abbreviated state name
 2 indicates 562 regulation authorization
 E indicates 1 cent oval die narrow E
 Note - 4 different refers to 4 different combinations of envelope color, knife (shape), or watermark are known.

Refer to the Envelopes catalog for complete details. Pricing is from the Envelopes catalog.
