Montana Precancels, Catalog and Guidebook

Introduction

This book is intended to be a catalog of known Montana precancels as well as a guidebook to assist the collector with the varieties listed in the Precancel Stamp Society (PSS) catalogs and other sources. It includes pictures of all the varieties. These can be used as correct scale templates for comparison with real stamps. There are 143 towns and 265 different precancel types recognized by the PSS in Montana.

Values are given as found in the Town & Type Catalog 8th Edition (T&T). T&T pricing is for the most common precancel of the designated type. I believe it is unwise to suggest alternative pricing for the known denominations – such pricing being overly subjective. It is always a good idea to pay a little more for something you have never seen before. However, items unlisted in this catalog should not be assumed to be rare or valuable. In Montana there are two A-rarity types (\$400). Montana would be one of the easiest states to acquire every type, as the total book value for the state is only \$1,892.50. T&T pricing can be considered a reliable, real-world retail valuation.

I consider this book to be a part of an ongoing project to locate and tabulate all denominations of Montana precancels. These listings include stamps from my own Montana general collection, items reported by other collectors, as well as items found in the references listed below. I have not editorialized the listings to remove precancels that were collector inspired. In truth, 99% of the listings not found in the 1952 state catalog would fall into that category.

I actively solicit information on any items not listed, including those found in earlier catalogs. With the correspondent's permission, they will be included in future versions. I will pay a fair price for any Montana items I need for my collection.

References

These references were searched for Montana precancel listings:

Items not in my collection are noted with:

- + indicates the denomination has been reported to me by another collector
- * indicates listed in 1952 Montana
- @ indicates unlisted items seen on Ebay offerings
- ^ indicates item is listed in 2011 Printed
- ~ indicates item is listed in one of the other catalogs mentioned above

Listings – Organization and Abbreviation

My organization and abbreviation of the listings is subjective. Currently there is no ‘best practice’ guideline for state catalog editors. What fits for one state may be inappropriate for another. Listings are generally chronological within city/type. An asterisk * after city name indicates a Discontinued Post Office (DPO) according to the T&T.

On printed precancels - inverts, positions, and multiples are indicated by lowercase letters: i=invert, nn=double normal, u=up etc. Coils are listed as H for horizontal perforations or V for vertical if ambiguous. In keeping with precancel tradition, stamp paper watermark differences are not distinguished.

1926 includes the Harding Full Face (1½FF), Stuart (3S) and Taft (4T) issues. Liberty includes Pershing (8P), Jackson (1J), Washington (5W), Flag (5F), and the Giori press Liberty as 8G, but does not differentiate the flat and rotary press 8 cent varieties. Prominent Americans (PA) include the blue USPS stamp (8USPS), the ZIP stamp (10Z), the Jefferson Memorial (10J), and the 6.3 coil. Eisenhower stamps are listed as 6E & 8E. Flags include the 6 cent Giori (6G) and Huck (6H) presses, and 8F, 10F. Great Americans (GA) and Transportation Coils have clarifying letters on denominations.

Se-tenant issues are listed with the number of stamps in parenthesis if complete:

1968: 6Flags(10) indicates 10 stamps, 1968: 6FlagsBennington indicates one stamp only.

A count of known denominations is provided in brackets. The total listed count is 10090. For example [120,5] indicates 120 denominations known - 5 needed for my collection.

Dated Controls

Printed Dated lists these:

Handstamp Dated lists these:

Billings: JIC J I Case Co
 Billings: MW Montgomery Ward & Co
 Billings: MW2 Montgomery Ward & Co
 Butte: GBC Graybar Electric Co
 Butte: TCP The Cuneo Press
 Great Falls: GM
 Great Falls: OFE Oliver Farm Equip Sales Co
 Great Falls: TCP The Cuneo Press
 Lewiston: SRC Sears Roebuck & Co

Authorizations Dates

Lyon List data are provided in small print preceding the PSS type. Abbreviations are:

E for Electrotpe – usually plate of 100 subjects
H for Handstamp (pre-1932 type) – 25 subject rubber device
WHE for Wide Hand Electro – 25 subject device prior to June 30, 1934, after that 10
NHE for Narrow Hand Electro – 10 subject device
V for Vinyl – 10 subject device

The Lyon List includes many authorization dates for precancels that have never been seen. These may not correspond to an actual shipment of precancels to the post office; however they do provide a clue to what Montana precancels could be undiscovered.

Authorized but undiscovered styles:

HANDSTAMPS (pre-1932 types): Fort Benton, Havre, Helena, Miles City, Pablo

NHE's: White Pine

VINYLS: these may be identical to the PSS listed varieties and therefore not separate listings: Big Timber 841, Butte 841, Fromberg 841

AR Sum32 items: In the summer of 1932, the POD automatically sent replacement precancel devices to post offices all across the country. These were new metal WHE styles meant to replace old rubber devices. In some places the rubber devices continued to be used, in others they were not. As a consequence, many pre-1932 rubber devices had a very short period of use, and some are rare. This explains the rarity of many types seen only of the 1932 Washington Bicentennial issue.

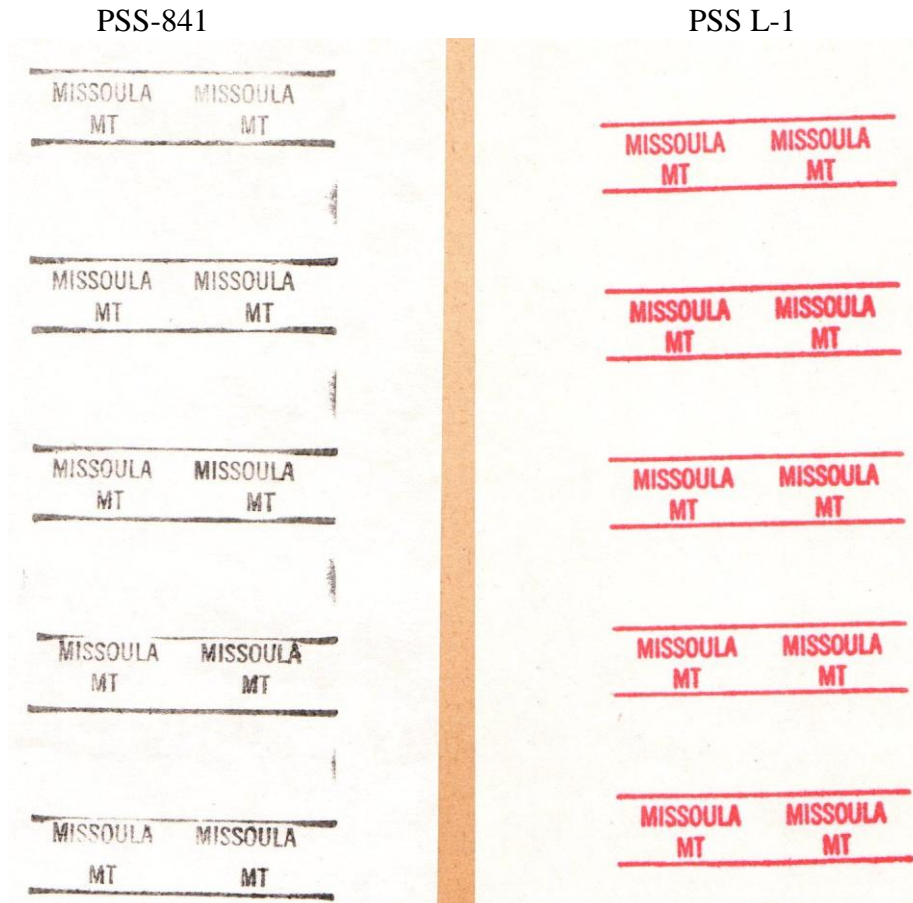

Perfins

Eleven prepers [perfin precancels] are known from six cities, pricing from 2009 Randall. In the listings, known perfins are listed in parenthesis, eg: (COCO) and not counted in the type-counts.

Billings	[IHC, International Harvester]	I43.7G-7 - \$4.00 - 5 varieties
Billings	[SO, Standard Oil]	S195-39 - 0.25 - 30 varieties
Butte	[CO/Co, Continental Oil]	C244 - 1.50 - 43 varieties
Butte	[circleM, State of Montana]	M12 - 4.00 - 3 varieties
Dillon	[circleM]	M12 - 8.00 - 3 varieties
Great Falls	[CO/Co]	C240 - 15.00 - 2 varieties
Great Falls	[CW/S, Charles Williams Stores]	C376 - 10.00 - 2 varieties
Great Falls	[IHC]	I43.7B-24 - 0.50 - 17 varieties
Helena	[IHC]	I43.7B-24 - 4.00 - 8 varieties
Helena	[circleM]	M12 - 4.00 - 2 varieties
Missoula	[circleM]	M12 - 4.00 - 5 varieties

Difficult Identifications

The only really difficult types are Missoula 841 and L-1. Proof impressions are provided below. The change was made in December 1995. The L-1 was self-inking, always with red ink. The fonts are similar. The L-1 has very consistent placement of the letters and line. The 841 has varying vertical and horizontal spacing.

Population of Montana Towns

According to the 2010 Census the population of Montana is 989,415 making it the 44th most populous state. Of the 143 PSS-listed towns only 138 show up in the Census Bureau reports. Greenough, Melrose, and Weldon appear to be isolated areas that have more stature with the USPS than with Census. Polytechnic was formally a university post office in Billings. The school is now Rocky Mountain College. West Glacier is just outside of Glacier National Park and not separately listed by Census.

The largest city in Montana is Billings with 104,170. The smallest Census-listed town with precancels is Ledger with 47 people. White Sulphur Springs at 939 is the largest town in Montana with no precancels.

Acknowledgements

Sincere thanks to Jim Hirstein, Duane Spidle, Roberto Colla, Bruce Brunell, Bill Cummings, Jim Callis, Gene Byers, and Arnold Selengut for encouragement, assistance, suggestions, and listings. Arnold provided scans of the 6 Montana Precancel types I did not have in my collection. I have taken many pictures from Bill's enormous reference book of non-precancels.

Montana Precancels Catalog and Guidebook, available online as montana.pdf, is the property of Charles Adrion and all rights are reserved. However, users are permitted and encouraged to download and print copies for their own personal non-commercial use.

POSTAL STATIONERY

A four part code is used to describe each face-different precancel envelope. Using Anaconda as an example 1b2E:

1 indicates large serif typeface

b indicates state name in full

2 indicates 562 regulation authorization

E indicates 1 cent oval die narrow E

Note - 4 different refers to 4 different combinations of envelope knife (shape) and watermark are known.

Refer to the Envelopes catalog for complete details.
