Vermont Precancels, Catalog and Guidebook

Introduction

This book is intended to be a catalog of known Vermont precancels as well as a guidebook to assist the collector with the varieties listed in the Precancel Stamp Society (PSS) catalogs and other sources. It includes pictures of all the varieties. These can be used as correct scale templates for comparison with real stamps. There are 244 towns and 493 different precancel types recognized by the PSS.

Values are given as found in the Town & Type Catalog 8th Edition (T&T). T&T pricing is for the most common precancel of the designated type. I believe it is unwise to suggest alternative pricing for the known denominations – such pricing being overly subjective. It is always a good idea to pay a little more for something you have never seen before. However, items unlisted in this catalog should not be assumed to be rare or valuable. In Vermont there are fifteen A-rarity types (\$400) and one AA type, Putney PSS-631 (only one known - \$1000). Because of the AA and A rated's, Vermont is a small but difficult state to complete. The total PSS value for the Vermont types is \$10,112.25. T&T pricing can be considered a reliable, real-world retail valuation.

The most recent Vermont general catalog was done by Crandall Wallenstein in 1982. Here is what he said about pricing:

“No one knows enough about the value of individual denominations to price them for any state. Sometimes we can identify a few common denominations for some particular types, but the existing local catalogs were always partly based on guesswork and partly on the stock of one individual dealer. As Manley Behrens often says ‘What I have is common, what I need is rare.’ That is true for all of us.”

I consider this book to be a part of an ongoing project to locate and tabulate all denominations of Vermont precancels. These listings include stamps from my own Vermont general collection, items reported by other collectors, as well as items found in the references listed below. I have not editorialized the listings to remove precancels that were collector inspired except for the case of Barre L-2 which are listed with a special note about how they are modern creations on old stamps. In truth, 95% of the listings not found in the 1982 state catalog would fall into the category of souvenirs.

I actively solicit information on any items not listed, including those found in earlier catalogs. With the correspondent's permission, they will be included in future versions. I will pay a fair price for any Vermont items I need for my collection.

The following is excerpted from Crandall R. Wallenstein's excellent 1982 Vermont Precancel Catalog without additional editorial comment from me. Crandall had a way with words.

"A LITTLE HISTORICAL EXPLANATION"

"In 1843 someone in Vermont invented precancels. As he was a member of the Temperance Society, I assume he was sober at the time. In the mid 1880's the first precancels showing the town and state were issued in Burlington. Fifteen other towns used devices of their own invention before the first government issued plates were sent to Burlington, Rutland, and Saint Albans.

As early as 1920, Vermont was ready to start on a course that led (according to A. F. Gamber's article in the September 1943 Forum) to Jerry Erikson saying "This state assays more junk per acre than any other state in the Union." That was before lightning struck Kansas.

Leon Gibson, a stamp dealer from Richford after the first world war, produced some interesting handstamps which for years passed as precancels. Some of the present listings may still be his work rather than postally used devices. He was friends with J. Lee Sanford, a part time dealer from Tilton New Hampshire who travelled the two states as a salesman for an optical company. Sanford succeeded in being appointed editor for the entire New England section of Rotnem's Standard Catalog of 1924. I believe that he was the one who neatly spread a long-accepted rumor that someone had generously made duplicate precancel devices for a number of Vermont and New Hampshire post offices, presenting one to the postmaster in each case, and keeping the second for handy production for his customers. This planted rumor was completely false and covered up for a number of fakes, most notably the PSS 461's. As editor of the catalog, Sanford listed many of his own and Gibson's creations.

When William B. Hale came along during the Black Harding craze, he seems to have obtained his famous hand-cut Belgium wood blocks for only a few Vermont towns. Apparently the field was only too well covered by his two predecessors. That almost ended the fake devices from Vermont, except for Ludlow and Fair Haven.

In 1934, a Montpelier stamp dealer named Bussell made a pair of rubber handstamps similar to the double line electros 243 and 247. These caused an uproar in every precancel periodical, and were promptly blacklisted by Fred Allen, Alan Vestal, and A. F. Gamber, the most frequently published authorities of the day. Doris Kiley, a Massachusetts dealer and collector, checked out their use and found the devices in the Post Office (where Dr. James found them ten years later,) but the opponents were adamant. It took years to overcome their baseless objections and to list these postally used precancels in the catalog as L-4 and L-5.

"Arco the Magician" as Otto Arco was known, was a precancel collector before 1918. He paid part of his travel expenses for one night stands throughout New England by taking orders for precancelled Walloons and other stamps. He frequently found friendly postmasters who would precancel just enough sets to fill his orders. He was not the first to supply eager collectors with bathtubbed material. It is most amusing to read the old precancel publications editorializing on the horrors of bathtubbing precancels (those made to order for collectors,) and simultaneously published lists of all new towns "using" each new issue of commems as far back as the 1918 Victory stamps.

So Adolph Gunesch was not the first to recognize that although the high priests of precanceldom sneered at all but postally used precancels, collectors want perfect overprints on perfect stamps – even the high priests – and such copies are rare unless someone goes to the post office and makes them. He sent several agents to Vermont to produce a string of favors. Even Dr. James kept a scorned list of "Gunesch products" – but he bought them. Meanwhile Bob Briggs travelled the state producing his famous ½ to 2 cent prexies for many towns plus an occasional oddity when he was flush. A great many types would be far more scarce without his generous benefits on behalf of all of us."

Items not in my collection are noted with:

- * indicates the denomination is listed in the 1982 Crandall Wallenstein catalog.
- + indicates the denomination has been reported to me by another collector
- # indicates listed in 2015 Classics Parts I and IIb
 - # is considered more authoritative than *, so # will replace * when applicable for pre-1922
- @ indicates unlisted items seen on Ebay offerings
- ^ indicates item is listed in 2011 Printed
- ~ indicates item is listed in one of the other catalogs mentioned above

Listings – Organization and Abbreviation

My organization and abbreviation of the listings is subjective. Currently there is no ‘best practice’ guideline for state catalog editors. What fits for one state may be inappropriate for another. Listings are generally chronological within city/type. An asterisk * after city name indicates a Discontinued Post Office (DPO) according to the T&T.

On printed precancels - inverts, positions, and multiples are indicated by lowercase letters: i=invert, nn=double normal, u=up etc. Coils are listed as H for horizontal

perforations if ambiguous, otherwise vertical is assumed. In keeping with precancel tradition, stamp paper watermark differences are not distinguished.

1926 includes the Harding Full Face (FF), Stuart (3S) and Taft (4T) issues. Liberty includes Pershing (8P), Jackson (1J), Washington (5W), Flag (5F), and the Giori press Liberty as 8G, but does not differentiate the flat and rotary press 8 cent varieties. Prominent Americans (PA) include the blue USPS stamp (8U), the ZIP stamp (10Z), the Jefferson Memorial (10D), and the 6.3 coil. Eisenhower stamps are listed as 6E & 8E. Flags include the 6 cent Giori (6G), Huck (6H) presses, 8F, 10F, etc.

Great Americans (GA) and Transportation Coils have clarifying letters on denominations. Some transportation coils denominations had a revised printing - they are listed as 1R etc.

Se-tenant issues are listed with the number of stamps in parenthesis if complete, example: 1968: 6Flags(10) indicates 10 stamps, 1968: 6FlagsBennington indicates one stamp only.

A count of known denominations is provided in brackets. The total listed count is 27,540. For example [12,4] indicates 12 denominations known - 4 in my collection (8 needed).

Dated Controls

Printed Dated lists these 7 denominations:

GMM Bellows Falls, user unknown

PSS-246, April 1940: 1926: 1/2, Prexy: 1/2, 1.

P&G Burlington, used by Proctor & Gamble

PSS-205, October 1941: Prexy: 7, 8, 8(OCT invert) .

DHM Sheldon Springs, used by DeForest H. Manley

PSS-749, July 1958: Liberty: 2.

Handstamp Dated lists these:

State	Town	Type
VT	BOMOSEEN	VBSCO
VT	BURLINGTON	ACW
VT	BURLINGTON	ACW2
VT	BURLINGTON	ACW3
VT	BURLINGTON	ECO
VT	BURLINGTON	ECO2
VT	BURLINGTON	HHCO
VT	BURLINGTON	HHCO2
VT	BURLINGTON	LDCO
VT	BURLINGTON	UNKNOWN
VT	BURLINGTON	VHC
VT	BURLINGTON	VHC2
VT	BURLINGTON	WR
VT	RUTLAND	MPL
VT	SAINT JOHNSBURY	H&H
VT	SAINT JOHNSBURY	H&H2
VT	SAINT JOHNSBURY	HHCO

PSS Souvenir->

Silent Precancels

These are documented in Silent Precancels. They were used to precancel mail although they do not have a City/State. There are 7 towns and 9 types known: Berlin, Bethel, Brattleboro, Burlington (2), Middlebury, Montpelier (2), Orange, and Rupert. See Dave Smith's excellent reference for details.

Authorizations Dates

Lyon List data are provided in small print preceding the PSS type. Abbreviations are:

E for Electrotape – usually plate of 100 subjects
H for Handstamp (pre-1932 type) – 25 subject rubber device
WHE for Wide Hand Electro – 25 subject device prior to June 30, 1934, after that 10
NHE for Narrow Hand Electro – 10 subject device
T for Typeset plates
V for Vinyl – 10 subject device

The Lyon List includes many authorization dates for precancels that have never been seen. These may not correspond to an actual shipment of precancels to the post office; however they do provide a clue to what Vermont precancels could be undiscovered.

Authorized but undiscovered styles, with authorization year:

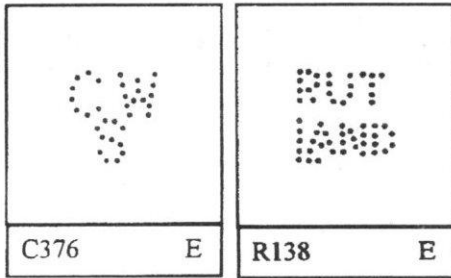

ELECTRO's: Brattleboro(1913), Ludlow(1933), Waterbury Center(1928).
HANDSTAMPS (pre-1932 types): Bristol(1924), Cambridge(1927),
East Charleston(1912), Grand Isle(1927), Jericho(1926), Milton(1926), Rutland(1924),
Saint Johnsbury(1908).
NHE's: Marlboro(1947), Sheldon Springs(1944).
VINYLS: Newbury/Newburg error(1955), Saint Albans(1975), Sherburne Center(1956),
South Hero, a possible second device(1977).

AR32 items: In the summer of 1932, the POD automatically sent replacement precancel devices to post offices all across the country. These were new metal WHE styles meant to replace old rubber devices. In some places the rubber devices continued to be used, in others they were not. As a consequence, many pre-1932 rubber devices had a very short period of use, and some are rare. This explains the rarity of many types seen only on the 1932 Washington Bicentennial issue.

Perfins

2009 Perfins lists only 2 perfin styles and 3 denominations in all of Vermont. Although the perfins are common E-rated, the Vermont-used prepers are scarce.

VERMONT

BURLINGTON

CW/S	C376	\$6.00	The Charles Williams Stores
	205	1914-1,2	

RUT/L(A)ND	R138	\$10.00	Rutland Railway Corporation
	205	1926-1½F	

Difficult Identifications

Most similar appearing types can be identified if you pay close attention to the spacing between the lines and whether the state has a period or not. Some tricky types are:

Bellows Falls - 807 has a period after state, often hard to see.

Only 2 of the 10 device positions has state inverted - so that is not a definitive indicator.

807

846

Essex Junction- examine city widths and shapes of letters

L-1

L-5

L-6

Putney - check spacing between town and state

L-3

L-5

Quechee - check spacing and shape of the letters in city

835.5

837

839

Saint Albans Bay - 843 city is 20mm, 848 city is 19mm

843

848

Counterfeits, Fakes, Provisionals, and Postcancels

There is no complete agreement on what these terms mean so for the purposes of this reference I am describing non PSS-listed items that look like precancels as follows:

Counterfeit: Collector-produced to imitate an existing genuine type

Fake: Collector-produced to look like a precancel but not an existing type

Provisionals: POD-produced, perhaps used to precancel but also used as a postcancel

Postcancel: POD-produced, not used to precancel, usually too wide

Provisionals and Postcancels are sometime hard to distinguish. Many were classified by old-time collectors who met with POD staff. I have simplified them as 'Not a precancel'.

Cummings has more complete data on these including perpetrators in some cases.

Population of Vermont Towns

Source: https://en.wikipedia.org/wiki/List_of_towns_in_Vermont

Vermont post offices are often named for places with no United States Census status. The size of a place like East Ryegate can only be estimated as 'Included in Ryegate'.

Another example is Adamant - that 'town' has been described in Wikipedia:

Adamant the village is situated on the town line between Calais to the north and East Montpelier to the south. There is no true boundary to define the village, and as such there is great debate as to what constitutes residence. This is, however, purely theoretical as there is no legal, governmental or commercial status associated with residence. The debate has given rise to the common aphorism that, 'Adamant is a state of mind'.

According to the 2010 Census the population of Vermont is 625,745 making it the 49th most (or least) populous state, only Wyoming has fewer people. Burlington with 42,417 is the most populous city. Averill, with only 24 residents, is the smallest town with listed precancels. Averill has more precancels than people! South Burlington with a population of 17,904 is the largest town without precancels.

Acknowledgements

Sincere thanks to Jack Franz (leading Vermont general collector and denomination adder), the late Bruce Brunell (who inspired my 3 books; Vermont, Montana, and Alabama), the late Bill Cummings (who provided listings for fake and wannabe precancels), Jim Callis (Lyon data), Gene Byers (dated data and scans). Arnold Selengut and Phil Cayford provided scans of scarce items not in my personal collection. All added encouragement, assistance, suggestions, or listings. Cliff Irving and Jan Kant also reviewed the listings and added items unknown to me.

Vermont Precancels Catalog and Guidebook, available online as [vermont.pdf](#), is the property of Charles Adrion and all rights are reserved. However, users are permitted and encouraged to download and print copies for their own personal non-commercial use.

841 (15,32) \$400.00

Footnote-15 - State over Town exists.
 Footnote-32 - two 841's exist, one with error.
 Picture courtesy of Arnold Selengut.
 I do not have this type.
 Quoting Wallenstein: The first vinyl device was issued in April, 1976. Two rows had the state inverted. It was also 841, and not another type. As far as I know only one imprint on 1 cent 1965 was released. It was badly off-center on a block of fifteen stamps.

As shown clearly in this picture there are THREE error rows and the error is state above town, not state inverted.

POSTAL STATIONERY

A four part code is used to describe each face-different precancel envelope. Using Barre as an example 1b2E:

1 indicates large serif typeface
b indicates state name in full
2 indicates 562 regulation authorization
E indicates 1 cent oval die narrow E

Refer to the Envelopes catalog for complete details.
